1 Introduction

The annual National Deafblind Child Count is the world's first and longest-running count of children who are deafblind. Begun in 1986 on behalf of the U.S. Department of Education, it represents a collaborative effort between the National Center on Deafblindness (NCDB) and state deafblind projects throughout the country, including those in the Pacific Trust territories, the Virgin Islands, and Puerto Rico.

The annual child count helps identify state and national technical assistance needs for children who are deafblind, their families, and the providers and systems that serve them.

1.1 Data Collection

Each year, state deafblind projects capture a point-in-time count of the number of children eligible for project services on December 1 as well as information about the special education services those children receive under the Individuals with Disabilities Education Act (IDEA), Part B or C.

- IDEA Part C covers early intervention for infants and toddlers with disabilities.
- IDEA Part B covers children and youth ages 3–21.

The official count used in this report is the number of children eligible for state deafblind project services on December 1.

NCDB provides technical assistance to the state projects to help them conduct their counts and compiles the data into this national report.

1.2 The Importance of an Accurate Count

The number of children identified as deafblind in the National Deafblind Child Count and the total included in the IDEA Part B child count are often vastly different. In 2023, 10,297 children and youth were identified with deafblindness (ages 3–21) according to the National Deafblind Child Count, while only 1,872 were identified in IDEA's 2022–2023 school year Part B count (U.S. Department of Education, n.d.).

This discrepancy occurs because the National Deafblind Child Count includes children whose sole disability is deafblindness as well as those with additional disabilities. In contrast, **IDEA Part B reporting regulations** instruct states to count children only when a child has deafness and blindness and no other disabilities.

Over the years, under-identifying or under-counting children who are deafblind has been a consistent problem. Accurately identifying all children who are deafblind is essential so they can begin receiving specialized services and supports that are critical to early development and learning (Herbster, 2015; Müller, 2006; Purvis & Schalock, 2014).

1.3 Overview of Deafblindness

Deafblindness is defined in **IDEA regulations** as

Concomitant hearing and visual impairments, the combination of which causes such severe communication and other developmental and educational needs that they cannot be accommodated in special education programs solely for children with deafness or children with blindness.

This is a common definition of deafblindness used by state deafblind projects, but they have the discretion to establish additional criteria for their services.

The population of children who are deafblind is one of the smallest yet most diverse groups of children receiving early intervention and special education services. In addition to deafblindness, many also have physical or cognitive disabilities, complex medical needs, and/or behavior challenges.

1.4 Understanding the Report Data

The National Deafblind Child Count includes data to help inform state and national technical assistance services and initiatives. This includes information on

- Gender
- Etiology
- Documented Vision Loss
- Cortical Visual Impairment
- Documented Hearing Loss
- Central Auditory Processing Disorder
- Auditory Neuropathy
- Cochlear Implants
- Other Impairments or Conditions
- Living Setting
- Intervener Services
- Use of Corrective Lenses, Listening Devices, and/or Assistive Technology
- Primary Language in the Home (Optional Reporting)

The report also includes the following data elements, which are consistent with those used in IDEA Part B and C child counts regarding all children receiving special education services:

- Race/Ethnicity
- Part B and C Category Codes
- Early Intervention Setting (Birth–2)
- Educational Environment (3–5 and 6–21)
- Participation in Statewide Assessments
- Part C Exiting Status (Birth–2)
- Part B Exiting Status (3–21)

1.5 Data Considerations

The method used to calculate the December 1 count total was changed in 2021. Previously, it was based on the number of children who were eligible for state deafblind project services *and* receiving IDEA Part B or C services on December 1. Now, it is solely the number of children who were eligible for state deafblind project services on December 1. The criteria for receiving IDEA services was removed because it excluded some children from the report, such as those who were on 504 Plans or who had exited school but were not yet 21 and were still receiving transition services. Due to this change, trend data cannot be generated using totals from past reports. Contact NCDB for assistance obtaining data for trend reports or analysis.

In 2020, modifications were made to several child count reporting elements (e.g., gender, educational settings). A clear understanding of these changes is important for anyone doing analyses that involve more than one year of data. Notes on the 2020 changes are included in relevant sections of this report. For additional information, see

- [2020 National Deaf-Blind Child Count Revisions](#)
- [Deafblind Child Count Change Log \(2007–2024\)](#)

2 Overall Population Demographics

On December 1, 2023, a total of 11,134 children were eligible to receive state deafblind project services. This is an increase of 549 from the 2022 total of 10,585. The number of children served by state deafblind projects at any time during the year increased from 11,454 to 12,491.

Ages

The 11,134 total includes

- 612 infants and toddlers (birth–2)
- 10,297 children and youth (3–21)
- 127 (age 22) from states that provide services through the end of the school year in which students turn 22 years of age
- 46 (ages 23–26) from Michigan, which provides services up to age 26 for students who meet state eligibility criteria, and other states that have allowed compensatory services
- 52 children who had missing information for birthdate

Race/Ethnicity

- White – 60%
- Latino or Hispanic – 21%
- Black or African American – 14%
- Other races (Asian, American Indian, Native Hawaiian, Two or more) – 14%
- Unknown or missing – 12%

Gender

- Male – 53%
- Female – 46%
- Other, unknown, or missing – <1%

2.1 State Child Count Totals

State	Total number served by state during year	Number on December 1 count
Alabama	252	205
Alaska	27	27
Arizona	233	224
Arkansas	270	266
California	1,117	1,055
Colorado	165	152
Connecticut	70	70
Delaware	66	66

Florida	658	658
Georgia	350	323
Hawaii	62	56
Idaho	78	78
Illinois	258	230
Indiana	260	244
Iowa	113	113
Kansas	131	131
Kentucky	192	185
Louisiana	142	131
Maine	62	49
Maryland	193	193
Massachusetts	271	268
Michigan	327	307
Minnesota	786	636
Mississippi	200	194
Missouri	604	54

State	Total number served by state during year	Number on December 1 count
Montana	44	42
Nebraska	103	98
Nevada	126	114
New Hampshire	88	88
New Jersey	192	188
New Mexico	159	158
New York	483	457
North Carolina	434	434
North Dakota	38	38
Ohio	389	365
Oklahoma	180	169
Oregon	98	98
Pacific Basin	70	68
Pennsylvania	632	565
Puerto Rico	45	40
Rhode Island	48	48
South Carolina	181	157
South Dakota	40	40
Tennessee	310	277
Texas	972	875
Utah	151	132
Vermont	41	39
Virgin Islands	18	17
Virginia	186	167
Washington	305	287
West Virginia	61	60

State	Total number served by state during year	Number on December 1 count
Wisconsin	145	133
Wyoming	41	41
Total	12,491	11,134

Note: Some states continue to provide services through the end of the school year in which the individual turns 22 years old. Michigan provides services to age 26.

3 Documented Hearing and Vision Loss

The range and types of hearing and vision loss illustrate the spectrum of the deafblind population. Only about 1% of children have profound hearing loss and total blindness. The other 99% have some residual hearing or vision.

3.1 Summary of Vision Loss Data

- Just under 80% (8,891) of children were identified as having low vision, being legally blind, or having documented functional vision loss
 - Low vision (35%)
 - Legally blind (20%)
 - Documented functional vision loss (25%)
- 4% were totally blind
- 30% had cortical visual impairment

3.2 Summary of Hearing Loss Data

- Profound hearing loss was the most common primary classification of hearing impairment reported, occurring in 21% of children
- 14% had mild hearing loss
- 20% had moderate hearing loss
- 16% had moderately severe hearing loss
- 10% had severe hearing loss
- 13% had documented functional hearing loss
- 4% were identified as needing further hearing tests

Relatively few children were identified as having central auditory processing disorder (388) or auditory neuropathy (563). These numbers represent 3% and 5% of the population respectively.

3.3 Use of Corrective and Assistive Devices

There has been a significant increase over the past five years in the percentage of children with corrective lenses (42% to 47%) and assistive listening devices (49% to 54%).

The number of children identified as having cochlear implants was 1,504 (14%) in 2023. Changes by age group from 2022 to 2023:

- Birth through age 2 – remained the same at 9%.
- 3 through 5 – decreased from 11% in 2022 to 6% in 2023.
- 6 through 21 – increased from 41% in 2022 to 43% in 2023.

The percentage of children who use assistive technology was 47% (5,277). Of these, 42% had four or more additional disabilities, while 22% had no additional disabilities.

3.4 Primary Classification of Vision Impairment

4 Etiologies

There are many causes of deafblindness, and each has unique characteristics and challenges. More than 70 causes were identified in 2023. Some are more prevalent, such as CHARGE Syndrome, Down Syndrome, Usher Syndrome, and Congenital Cytomegalovirus (CMV), with 100 or more cases of each reported every year. Annually, about 20 identified causes have fewer than 10 reported cases. Some of these, such as Waardenburg Syndrome and Cogan Syndrome, are exceedingly rare with just one or two cases reported annually.

Here are some highlights from the data:

- The number of children with hereditary syndromes and disorders was 5,563 in 2023, accounting for 50% of all etiologies.
- The number of children with CHARGE syndrome was 1,100.
- The prevalence of both Stickler syndrome and Cornelia de Lange syndrome decreased but both are still relatively rare.
- Prenatal congenital complications accounted for 13% and postnatal non-congenital complications accounted for 10%.
- Congenital rubella syndrome (CRS), which has long been associated with deafblindness, is no longer common in the U.S.; 29 children had CRS, which is down from 30 in 2021. Of these, 14% are younger than 10, and the youngest age is 4.
- The etiology was undetermined in 1,965.

4.1 Primary Identified Etiology

4.1.1 Hereditary Syndromes/Disorders

Condition	Total
CHARGE Syndrome	1,100
Usher Syndrome (I,II,III)	486
Down Syndrome (Trisomy 21 Syndrome)	391
Stickler Syndrome	152

5 Additional Disabilities

In 2023, 79% of children were identified as having one or more additional disabilities, most commonly speech/language impairments (83%), cognitive impairments (72%), and orthopedic/physical impairments (65%). Approximately half (53%) were identified as having complex healthcare needs.

The number with multiple additional disabilities has increased over time. In 2005, just 13% had four or more additional disabilities. In 2023, the number was 40%. Twenty-one percent had no additional disabilities.

6 Part C Information

Under IDEA, eligibility for Part C services is based on how each state defines an infant or toddler with a disability, which must include those with a developmental delay and those “with diagnosed physical or mental conditions with a high probability of resulting in developmental delay” (Frank Porter Graham Child Development Institute, 2021).

Most children who are deafblind were reported under the Part C Developmental Delay category. Some state Part C programs include the category “At-Risk.” About 19% of children in the deafblind count were reported in this category. Almost all Part C intervention services were provided in the home.

7 Part B Information

This section includes the following data about children receiving IDEA Part B Services:

- Disability category
- Educational environment
- State assessments

7.1 Disability Category

Disability category refers to the primary disability listed on the child's Individualized Education Program (IEP) and/or service plan. The most common disability categories in 2023 were:

- Multiple Disabilities (38%)
- Deaf-Blindness (21%)
- Hearing Impairment (11%)
- Other Health Impairment (7%)
- Intellectual Disability (7%)
- Visual Impairment (4%)

As noted in the introduction to this report, there is a large difference between the number of children identified as deafblind in the National Deafblind Child Count and the number identified in the IDEA Part B count. The fact that only 21% were identified as having deafblindness in the 2023 IDEA Part B count underscores this discrepancy, which occurs because IDEA Part B reporting regulations instruct states to count children only when a child has deafness and blindness and no other disabilities.

The difference between the two counts is important because approximately 79% of the children in the National Deafblind Child Count have one or more additional disabilities. It is common for children with deafblindness to be listed under a different disability category on the IDEA Part B child count depending on the severity of the additional disabilities they experience.

7.2 Educational Environment

The percentage of young children, aged 3 to 5, educated in regular early childhood education settings for some portion of the day was 40% in 2023. The percentage of children aged 6 to 21 being served at least a portion of the day in a regular classroom was 68%.

Note: Early Childhood Program Definitions

- Services in Regular Early Childhood Program (at least 10 hours) – Attended a regular early childhood (EC) program at least 10 hours per week and received the majority of hours of special education and related services in the regular EC program.
- Other Location Regular Early Childhood Program (at least 10 hours) – Attended a regular early childhood program at least 10 hours per week and received the majority of hours of special education and related services in some other location.
- Services in Regular Early Childhood Program (less than 10 hours) – Attended a regular early childhood (EC) program less than 10 hours per week and received the majority of hours of special education and related services in the regular EC program.
- Other Location Regular Early Childhood Program (less than 10 hours) – Attended a regular early childhood program less than 10 hours per week and received the majority of hours of special education and related services in some other location.

Notes:

- Home School/Remote Learning includes students who received special education and related services outside the regular classroom 100% of the school day every day, including those receiving remote/online learning in the home. Special education and related services may or may not be at public expense.
- Previous National Deafblind Child Count reports included the columns "Not Served Under Part B" and "Unknown or Missing" in this table. These could not be provided for 2023 due to incomplete data.

8 Educational Supports

Interveners provide access to information, the environment, communication, and conceptual learning for children who are deafblind. Growth in intervener services has been increasing.

The number of children receiving intervener services rose from 821 (8%) in 2022 to 987 (9%) in 2023.

Note: Not applicable may mean a child is too young for an intervener or a state does not recognize the role of interveners.

9 Living Setting

Most children live at home with their parents or extended family (95%). Small numbers live with foster parents, in state or private residential facilities, pediatric nursing homes, or group homes or apartments.

10 Exiting Information

Exiting status refers to whether a child was receiving Part B or Part C services at the beginning of the reporting period but left sometime before the end of the 12-month reporting period and, if so, for what reason. It also identifies if a child who has left Part C is eligible for Part B services. These tables show the cumulative total, rather than the December 1 total because children may exit anytime during the reporting period.

Reasons children exited Part C included that they were withdrawn by parents, were not able to be contacted, moved out of state, or died.

Reasons children exited Part B included that they graduated, aged out, transferred to regular education, dropped out, or died.

10.1 Part C Exiting Status (Table 1 of 2)

West Virginia	2	0	1	0
Wisconsin	0	0	0	0
Wyoming	0	0	0	0

State	Deceased	Moved: Known to be Continuing	Dropped Out	Graduated with Alternate Diploma
Total	20	267	59	24

Notes:

- Beginning in 2019, Part B Exiting Status includes only children aged 14 and older. Prior to 2019, it included any child aged 3 and older.
- Some states continue to provide services through the end of the school year in which the individual turns 22 years old. Michigan provides services to age 26
